June 2015 - To present

Sr. Software Developer @Cyber Infrastructure Pvt. Ltd.

April 2013 – May 2015

Software Developer @Kragos Technologies

Knowledge Sharing CMS App – Manmohan Singh

This is a CMS application. This app has articles and quiz based on articles. The articles are basically information about the company's product and its services. The employee of company logged in to system via a third party API which uses employee code. The employee read the article and can take part in quiz.

Accounting App – Elizabeth Gallo

This is an application for the client's internal purpose. It has a system to manage attorneys, assistants, cases, firms, and servers. The application imports all the leads from the WP site and also sends mails.

Form Builder Application

This application has the functionality to created forms. These forms can be submitted from the application in tabs so commons fields in the form will be auto-filled in other forms if users filling the same field in a form. The 3 user types are present on this application. The Stripe payment gateway is used for payment.

Ecommerce app for Diamond merchant

Worked on the client's existing web application. Integrated payfast payment gateway, updated the featured section of the site. Customized the import functionality of the application.

SaaS-Based Ecommerce System

Worked on the API for a Saas based system created on Django Rest. This system has b2b and b2c section. Worked on the b2b section and created API for the product, vendor, supplier, categories, tags, attributes, etc.

Directive

For the Directive worked as a support team member. They have the number of clients who are having sites on Joomla. I have worked for the support that includes custom extension development, extensions customization, extension's bug fix, template customization, extension or Joomla update.
