WORK EXPERIENCE

Project #1 E-Concept

Duration: From May 2019 to Present

Profile: Software Developer

About Project: E-Concept is an E-Commerce ,E-Learning website having mainly 3 modules (Student modules, Teacher modules and admin modules). In student modules students can login there, they can enroll to any courses, some of the courses are paid and some of them are free. I used Paytm payment gateway for payment . Student can post thre query, comment, like and dislike a courses In student modules there is a examination section in which user can give exam on the basis of course in which they enrolled.

In teacher modules teacher can upload videos, they can post some question during the live class to a particular student. The admin modules can

handles all administrative work such as giving the access of some functionality according to the user choosen plan. There are some more features in this this project such as teacher and student can attend video call or chat to each other.

Project #2 **Build Gate**

Duration: From Feb 2018 to April 2019

Profile: Software Developer

Job Profile: It is on ERP model based website. Which is used to handles aboard Expanses to build big buildings in city. There are mainly three process happening in this project. Those are purchase request, purchase order and book expanse. So first user will get the request regarding the material which is needed, then the supervisor will verify those request and placed that order and when they got that material supervisor will update those purchase order into booked expense. User can send request for multiple items at a time with their price and quantity and they can even pay multiple item also at a time . There is a dashboard in this project on which we can see all the details about all expense. In this project we used python 2.7 and django 2.
